אוניברסיטת תל אביב | בניין רוזנברג, אולם 01

Abstract: In 1986, the philosopher of science Yehuda Elkana published his article “The Emergence of Second-Order Thinking in Classical Greece” which dealt with the development of conceptual and critical thinking in ancient philosophy. This paper aims to ask a similar question for the Hebrew Bible: When, how and why did “thinking about thinking” became an issue in ancient Israel?
